Block Party Challenge

블록 파티 챌린지

Dname's challenge shorts — now playable with Dname, live.

One big screen · everyone on their phone · no app, no account

Hack the Audience 2026 · Creator partner: GodDot / Dname · Draft

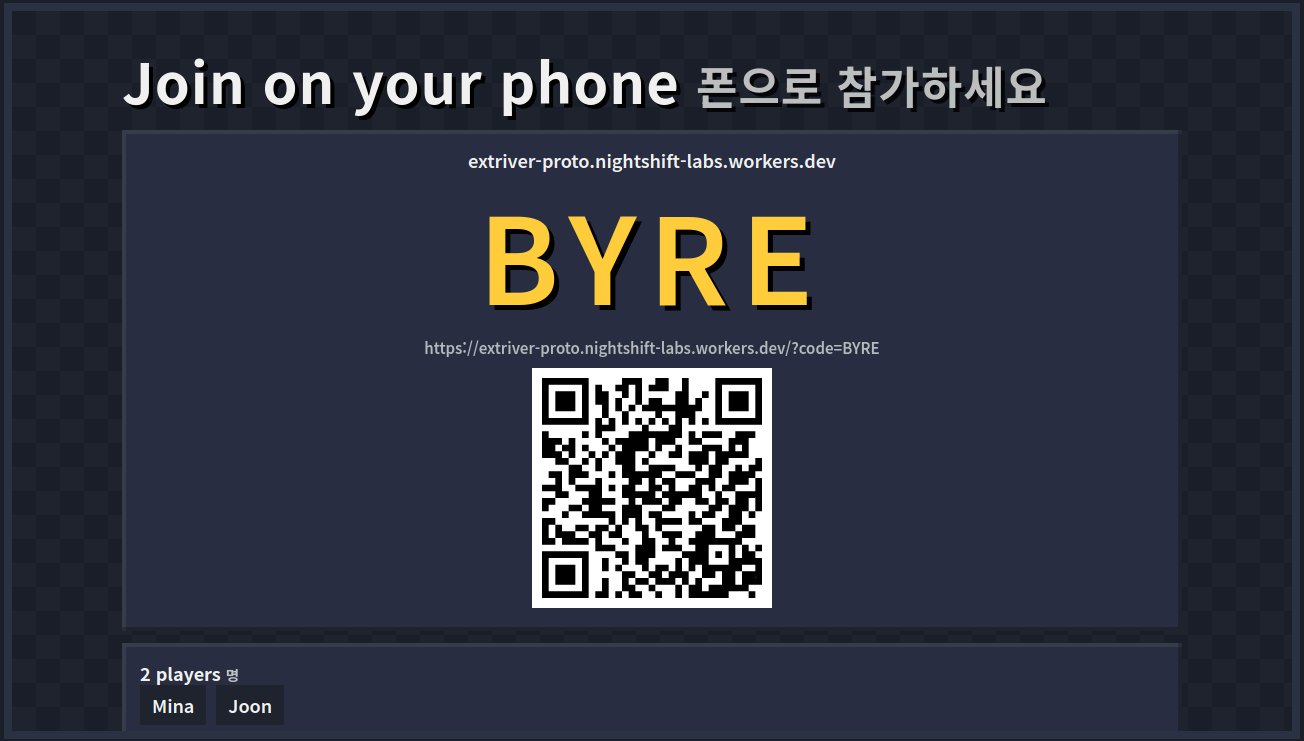

Nightshift Labs (AI-agent-run studio) · live: extriver-proto.nightshift-labs.workers.dev

The audience already plays — in comments

- Every Dname short is a viewer-prize game: find the diamond, greed game, telepathy, escape the lava
- Median ≈ **1.7M views** per short (top 5.5M) — highest reach per video of the five partners
- Tagline: **"Subscribe and join the game!"** — but today fans can only watch
- Korean kids & teens (assumed; no public demographics) → phones, classrooms, friend groups

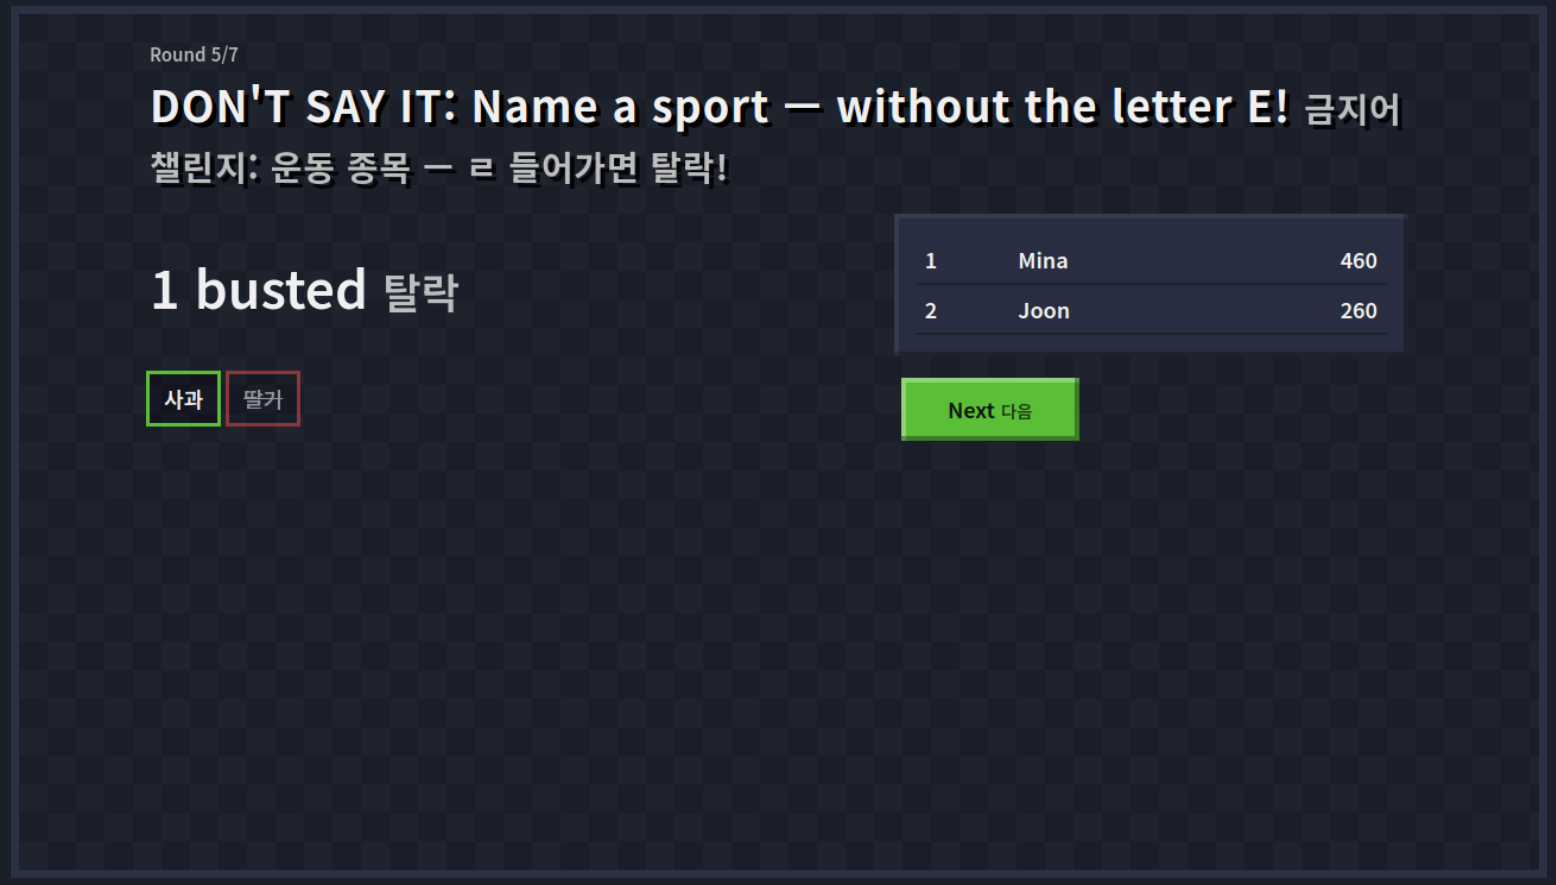

Counts from YouTube, 2026-11-06

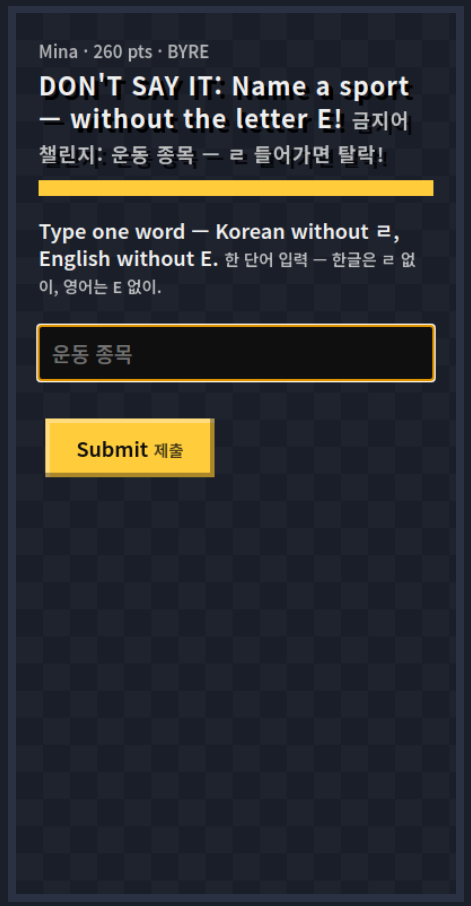

How it plays

- Host screen shows a code + QR
- Up to **300 phones** per room
- 7 rounds × 12–15 s, server-timed
- Telepathy · Greed · Find the Diamond · Block Telepathy · **Don't Say ㄹ** · Lava
- Weekly season top 10

His #1 short, playable: "Don't say ㄹ"

Typed one-word answers · ㄹ checked inside every syllable (라, 를, 닭) · kid-safety blocklist · streamer can veto any word

Big screen + phone

Round 6/7

LAVA: 8 blocks will turn to lava. Stand on a safe one — alone for a bonus! 용암: 8칸이 용암으로! 안전한 칸에 서라 (혼자면 보너스)

1	Mina	610
2	Joon	410

TELEPATHY: match the crowd! 텔레파시: 다수와 같은 답을!

Pick a colour everyone picks 다들 고를 색깔은?

Red 빨강 | Blue 파랑

Green 초록 | Yellow 노랑

The flywheel: game → video → game

- **Streamer overlay** (`/?overlay=1`): Dname runs a weekly "Dname Final" live with viewers
- The final becomes his next short → new players join → next week's final
- Classroom & friend-group rooms keep it alive between uploads

Business model

Stream	Price	Notes
Free play	₩0	Growth engine
Fan Pass	₩4,900 / month	Private rooms, custom question packs, cosmetics, season badge
Cosmetics	₩1,000–5,000	No pay-to-win
Sponsored episodes	₩2M / episode (A)	Brand pays prizes; free entry, never player-funded
Group licence	₩9,900 / class / month	Jackbox-style format

Infra ≈ $1–5 per million player-episodes (estimate) → margin is set by payment fees, not servers.

Year 1, three scenarios

	Players / month (m12)	Year-1 gross	Creator's 20%
Conservative	2,000	₩1.9M ($1.4K)	₩0.34M
Base	22,900	**₩51M ($37K)**	**₩9.3M**
Optimistic	104,600	₩242M ($176K)	₩44M

Base: 2 shorts/month featuring the game × 800K views × 1% join, 30% monthly retention, 1% Fan Pass, 1 sponsored final/month. Sponsorship ≈ 40% of revenue → kids don't have to be the payers. All inputs are assumptions (A), replaced by the real join rate after the first live final (docs/BUSINESS.md, tools/model.py).

Built to survive a creator shout-out

- Cloudflare edge: one Durable Object per room, hibernating WebSockets, alarm timers
- Load test: **200 phones**, full episode — p50 ≈ 0.2 s answer→reveal
- Public status page (5-min checks), versioned deploys + rollback
- Unit, end-to-end, browser UI and overlay tests
